GETTING STARTED

IMPORTANT WARNING: NEVER TRY TO INSERT OR REMOVE A GAME PAK WHEN THE POWER IS ON.

Instead, first turn the power OFF on your N64™.

Then insert the Game Pak into the slot of your N64™. Press firmly to lock the Game Pak in place.

Turn the power switch with ON. Now after the appearance of the title and legal screens will appear, which, you may by bypass at any time by pressing START.

CONTROL STICK FUNCTIONS

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional Control Pad.

When turning the Control Deck power on, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R Buttons.

Because the Control Stick is a precision instrument, don't spill liquids on it or place foreign objects into it. If you need any assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center.

BACKGROUND STORY

PHUTTA MORGANA is on the attack once again. This powerful and notoriously cruel military organization won't stop until it has conquered the world.

A month ago, PHUTTA MORGANA exploded a special heat-generating bomb in the antarctic. As a result, major seaboard cities, including Tokyo and New York, have been flooded by the melting Antarctic ice. At the same time, PHUTTA MORGANA's forces have begun their long-awaited DOOMSDAY invasion. The world is in chaos, fearful of this demonic crisis. What's more, PHUTTA MORGANA has totally immobilized the world's ground units. Naval forces, meanwhile, are occupied with saving huge numbers of refugee. The only hope is Operation **PROJECT BLUE**.

"PROJECT BLUE" is the code name of a Peacekeeping Force organized by the United Nations to maintain world harmony. Over the years, PROJECT BLUE's elite team of **AEROFIGHTERS** have faced PHUTTA MORGANA on numerous occasions. But without a doubt, this is the most critical battle in its history, for the lives of millions are at stake.

Shortly before your first mission against PHUTTA MORGANA, the U.N. Secretary General meets personally with you and the rest of the AEROFIGHTER squadron. "We can't rely on support from the other units," he says. "The entire future of our world is in your hands."

Now it's up to you to scramble with the AEROFIGHTERS and set out on the most dangerous and important mission of your lives. **Good luck!**

PACIFIC OCEAN

DESTROY ENEMY FLEET

PHUTTA MORGANA has moved his army fleet to the Pacific Ocean. Battleship **Leviathan** leads the armada, which consists of four fighter aircraft and many submarines and frigates. The **AEROFIGHTERS ASSAULT** team must take them all out. The Battleship **Leviathan** has the ability to submerge, so don't lose it in your sights.

AIR DOCKING

LAND ON AIR CARRIER GOLIATH

This is a bonus mission. You and your three wingmen will be landing on the Air Carrier Goliath. Your flying skills are put to the ultimate test here. To get the most points, you'll need to fly through the gate, then circle the Air Carrier to perform a "carrier break." Landing is critical, so focus on the landing strip and watch your speed.

AIR BATTLE

DESTROY ENEMY FLYING FORTRESS

The AEROFIGHTERS ASSAULT team is in for a nasty dogfight. PHUTTA MORGANA has called for its fleet of Stealth aircraft and it appears he owns more than the U.S. Pentagon. You'll be in the clouds durling this air battle, so there's no need to watch out for obstacles. Intelligence reports that PHUTTA MORGANA has prepared a super weapon, so be careful.

DESERT

CONDUCT RECONNAISSANCE OF TORNADOES

This is a simple mission. Fly over the Monument Valley and conduct a reconnaissance of tornadoes. Some information has been leaked to us by a spy in the PHUTTA MORGANA clan. Apparently PHUTTA MORGANA is moving a largemachine called Bazeel, an unknown number of aircraft and ground vehicles along the desert Floor.

SHUTTLE DEFENSE

DEFEND THE SPACE SHUTTLE

Some of PHUTTA MORGANA's ground troops and aircraft have slipped through our AEROFIGHTERS ASSULT team's blockade. They are headed towards the A Space Shuttle launch. It is up to you to defend the launch. You'll be flying solo on this mission, so watch your back.

FORTRESS

DESTROY ENEMY SUPER FORTRESS

PHUTTA MORGANA's hideout has been discovered. We're sending the AEROFIGHTERS ASSAULT pilots in to destroy the enemy Super Fortress. It is very important that you succeed because this is the brain behind PHUTTA MORGANA's revenge against the world. Time is of the essence in this mission, so don't spend too much time messing around with enemy aircraft.

GOLIATH DEFENCE

DEFEND THE GOLIATH WHILE IT IS DOCKED

Air Carrier Goliath is reloading supplies. PHUTTA MORGANA has discovered its docking location and has sent an unconfirmed number of attack helicopters. Our long-range radar has picked up seven waves of threats.

You are alone with no wingman support. It's up to you to protect the Goliath from enemy attack while it is docked. The Air Carrier Goliath only needs five minutes to complete supply reloading.

ANTARCTIC OCEAN

DESTROY REMAINING ENEMY AIRCRAFT

The PHUTTA MORGANA army is falling to its knees. There are just a few aircraft left to defend it. But these pilots are best of the best, which PHUTTA MORGANA has reserved for just this moment. They fly very advanced aircraft, but don't let them scare you. Destroy remaining enemy aircraft.

ICE CAVE

DESTROY THE ENEMY

We've located PHUTTA MORGANA's hideout. The Air Carrier Goliath has been sent to the location in Antarctica. The only information available is that inside the cave is a junction. You'll be alone with no wingman support. Enemy intelligence is unknown. Take it slow because You'll be flying through a cave.

DEATH MATCH

The best of the best top guns play here. You and a second player can wage dog fights with each other in one of four fighter jets.

STAGE

Choose one of three stages, SKY, OCEAN, and DESERT. Each stage has its own obstacles in addition to the opponents you're up against.

DESERT

The DESERT is a desolate place with large rocks and canyons.

SKY

In the SKY you'll find nothing that to avoid, except for the other guy.

OCEAN

Large icebergs float in the OCEAN, and you must fly high to avoid them.

TIME

You can only kill each other for so long. Set the time for 600 seconds, 300 seconds, or infinite. When time runs out, the winner is the pilot with the most kills.

SPECIAL

Every jet has a powerful missile referred to as a special weapon. The default is "two special," but to add a greater challenge, you can set the special to "infinite."

DEFENSE

Each of the fighter jets is equipped with a defensive mechanism. Chaff is used to deflect homing missiles. You're given the option to have 10 or infinite Chaffs/

BOSS ATTACK

The four bosses you can select are also found in the MAIN GAME mode. Boss Attack can be played in a single-player or multi-player mode.

SUPER X WALKER

Found in Tokyo, the Super X Walker puts the imperial Walkers to shame. As tall as this monster appears, you won't have too much trouble knocking it to the ground. Before it takes out too many buildings, feed it full of lead.

LEVIATHAN

Roaming the waters of the Antarctic, the Leviathan is one large battleship. Its capabilities are unmatched by any naval vessel. Air attacks are its weakness, but beware of its massive deck guns.

SPRIGGAN

The wing span of the aircraft Spriggan appears infinite compared to your fighter jet. The Spriggan has stealth capabilities, but doesn't move too fast. You'll find this giant bird flying high in the sky. Be aware of its special attack laser.

BAZEEL

The Bazeel is a desert tank protected by indestructible armor. The camouflaged shell blends in with the color of the desert sands, so use your radar to pick up its tracks. Be aware of its quick turns because it'll bombard you with a ton of ground-to-air missiles.

OPTION

The AEROFIGHTERS ASSAULT team is made up of four of the best top gun pilots in the world. Hawk, Glenda, Hien, and Volk make up the assault team and it's up to you to pick the one pilot that will save the world. The team works great together on combat missions, but each member would gladly enter the ring in the Death Match mode at anytime.

AEROFIGHTERS HEADQUARTERS

STRATEGY OF FIRST MISSION

BRIEFING WITH ELLEN

YOUR MISSION: Defend the Metropolitan Building.

ENEMY FORCE: Super X Walker; four fighter aircraft; unknown number of enemy aircraft.

TOP SECRET: The Super X Walker has a weak defensive area in the lower front of its armor.

MISSION TIME: 15 minutes. You have additional support from the Metropolitan Defence team.

TEAM WORK

Choose a pilot that matches your ability. The three remaining pilots will fly as your wingmen, attacking other enemy aircraft and the Super X Walker. Your job is to destroy any enemy threat.

DOG FIGHT

You'll come across numerous helicopters. Even though these enemy aircraft pose a minor threat, they are your enemy. They can fly circle around you, but if you can lock onto them, you can easily knock them out of the sky.

Every enemy fleet has an ace pilot. In this case, it's an FS-X top gun. follow your teammate and he'll lead you right to him. If you're good enough, you shouldn't have any problem keeping up with this pilot. if you cannot lock onto him, use your main guns.

ATTACK THE SUPER X WALKER

If you're feeling lucky and you've got the armor, fly just above the water. You can easily attack the Super X Walker's weak defensive area from here. You can even fly between its legs, but use this tactic only at high speeds.

If you're pretty beat up after the dog fighting, then attack the Walker from a high attitude. Its guns won't pickup on you, but your heat seeking missiles will home in on the Super X Walker. Try this attack at a slow speed.

After flying past the Super X Walker, use the BOSS VIEW to avoid missiles it launches at you. If you find yourself under a heavy attack, perform barrel rolls at a slight upward pitch to help you avoid major damage.

Depending on the difficulty setting, the Super X Walker doesn't take too many hits to stop. You may have to launch two special weapons and a dozen sub missiles, but when you bring it to its knees, it will light up the sky. With any luck, your wingmen will still be in the more damage you do to the enemyland the less damage is done to you, the more points you'll earn.
